CAREER SUMMARY

Passionate AI/ML Engineer with a strong foundation in machine learning, deep learning, and Python. Skilled in building intelligent models, analyzing data, and developing AI-driven solutions for real-world challenges. Proficient in TensorFlow, PyTorch, Scikit-learn, and data visualization tools. Eager to apply innovative AI techniques while continuously learning and contributing to organizational growth.

ACADEMIC PERFORMANCE

AI / ML -Data Science

Tops Technologies | Pursuing

B.Tech – In Computer Engineering

Noble University | 2025

Diploma In Computer Engineering

Noble University | 2022–2025

SSC

Javiya Schooling System–school , Junagadh | 2022

PROJECTS

SV Closures (Live Project) | Website Development Project

Developed a modern and responsive corporate website for SV Closures, a manufacturer of high-quality bottle caps and packaging closures. The website showcases the company's products, manufacturing capabilities, quality standards, and business services through an intuitive user interface. Implemented product galleries, company information pages, contact forms, and mobile-friendly design to enhance customer engagement and strengthen the company's digital presence. The project focused on improving brand visibility, user experience, and online product presentation.

Customer Churn Prediction | Machine Learning Project

- Predicted customer churn using classification models to identify at-risk customers and enable proactive retention strategies.
- Built an interactive Power BI dashboard to visualize churn trends, customer segments, and key risk indicators.

Weather Prediction System | Machine Learning Project

Built a Weather Prediction System using Python and weather APIs to provide real-time forecasts and weather insights. Implemented data processing, visualization, and predictive analytics features to display temperature, humidity, wind speed, and rainfall information through an interactive dashboard

EXPERIENCE

Fresher

AI / ML Engineer

INTERNSHIP

Web Development Intern (3 Months) Tech Rover

Completed a Web Development Internship at Tech Rover, where I gained hands-on experience in designing and developing responsive websites and web applications. Worked with HTML, CSS, JavaScript, Bootstrap, and modern web development frameworks to create user-friendly interfaces and improve website functionality. Collaborated on front-end development tasks, debugging, testing, and performance optimization while following industry best practices. Developed practical skills in version control, responsive design, API integration, and deploying web applications in a professional development environment.

TECHNICAL SKILLS

- **Languages:** Python, SQL, C++, JavaScript
 - **Analytics Tools:** Power BI, Tableau, Advanced Excel, Pandas, NumPy
 - **AI Tools:** Claude AI, Google Gemini, ChatGPT, n8n, Antigravity (AI), Prompt Engineering
 - **ML & AI:** Scikit-learn, TensorFlow, Machine Learning, NLP, Deep Learning, Predictive Modeling
 - **Databases:** MySQL, MS SQL Server, MongoDB
 - **Web & Dev Tools:** Flask, Git, GitHub, Jupyter Notebook, VS Code
 - **Core CS:** Data Structures & Algorithms, OOP, Statistical Analysis
-

SOFT SKILLS

- Problem-Solving
- Analytical Thinking
- Team Collaboration
- Communication Skills
- Adaptability
- Time Management

LANGUAGE SKILLS

- English
 - Hindi
 - Gujarati
-

CERTIFICATE

- Practical Cisco Networking Labs in Cisco PacketTracer.
 - Digital Productivity.
 - Basics of Computer networking.
 - Advanced SQL
-

INTERESTS

- Reading Technology Blogs
- Coding & Problem Solving
- Learning New Technologies
- Participating in Hackathons
- Playing Chess
